

# MOHD SAKIB ANSARI

Mumbai, Maharashtra, India | +91-9820817430 | mohdsakibansari432@gmail.com | LinkedIn | GitHub

## SUMMARY

---

Motivated Flutter developer with 10+ months of hands-on internship experience building production-grade mobile applications. Proficient in Dart, REST API integration, Firebase, and MVVM/MVC architecture. Demonstrated ability to design scalable app architectures, implement complex features (multi-role auth, audio processing, image editing), and collaborate in cross-functional teams. Passionate about clean code, performance optimization, and delivering user-centric solutions.

## WORK EXPERIENCE

---

### Flutter Developer Intern

Sep 2024 – Nov 2024

*DigiLateral*

*Mumbai, Maharashtra, India*

- Developed an **image editing feature** with REST API integration to fetch, edit with custom text overlays, and export images in PDF and JPG formats, delivering a scalable multi-format solution.
- Integrated **multiple REST APIs** for data fetching and posting, ensuring reliable communication between Flutter frontend and backend services.
- Engineered a **multi-role authentication system** supporting distinct login flows for users, teachers, students, and admins — reducing onboarding friction across user segments.

### Flutter Developer Intern

Feb 2024 – Aug 2024

*Valensc Solution LLP*

*Mumbai, Maharashtra, India*

- Architected the app using the **MVVM design pattern**, improving code modularity, testability, and long-term maintainability across the codebase.
- Integrated **Firebase Realtime Database** for authentication and live data sync, enabling secure user sessions and real-time updates.
- Collaborated with cross-functional teams to deliver full-cycle mobile features from design to deployment, adhering to sprint timelines.

## PROJECTS

---

### Voice Recorder with AI Audio Processing | *Flutter, Dart, SQLite, REST API, Python Backend*

- Built a voice recorder app that captures audio, transmits recordings to a Python backend server, receives **noise-filtered audio**, and persists processed files locally using SQLite for offline access.
- Implemented file storage and async network handling to ensure seamless data flow between Flutter client and Python processing service.

### IcerateImage — Image Editing Tool | *Flutter, Dart, SQLite, REST API*

- Developed a feature-rich in-app image editor supporting server-side image fetching, **customizable text overlays**, and multi-format (PDF/JPG) export for professional use cases.

### Pokémon App — Third-Party API Integration | *Flutter, Dart, REST APIs*

- Built a mobile app consuming a **public RESTful API** to fetch and display Pokémon data (name, type, abilities) in a responsive, user-friendly interface using GET/POST methods.

### To-Do List App | *Flutter, Dart, SQLite*

- Created a full-featured task manager with CRUD operations and **local SQLite persistence**, demonstrating proficiency in offline-first mobile architecture.

## TECHNICAL SKILLS

---

**Languages:** Dart, Python, JavaScript, HTML, CSS

**Frameworks & Architecture:** Flutter, Django, Flask, MVVM, MVC

**Mobile & Backend:** REST API Integration, FastAPI, Firebase (Auth, Realtime DB), Audio Processing

**Databases & Storage:** SQLite, MySQL, Hive (Local Storage), SharedPreferences

**Tools & Platforms:** Android Studio, VS Code, Git, GitHub, Firebase, Postman

**Certifications:** Flutter, Django, Flask
