SUMMARY

Motivated and self-driven developer with hands-on experience in Flutter app development and FastAPI backend development. Skilled in building real-world applications involving audio processing, file storage, API integration, and responsive UI design. Strong problem-solving ability with practical project experience and a continuous learning mindset.

WORK EXPERIENCE

Intern in ValenscSolution LLP

Feb 2024- August 2024

- Designed app architecture using MVVM pattern components, improving code maintainability
- Integrated Firebase real-Time database for Authentication Functionality.

Intern in DigiLateral

Sep 2024- Nov 2024

- Image Editing Feature: Implemented functionality to fetch images from a server using REST APIs
 - API Integration: Integrated multiple APIs for fetching and posting data, ensuring smooth communication between the app and backend services.
 - Multi-Login Functionality: Developed and implemented multiple login flows for distinct user roles (e.g., teachers and students, admin, user).
-

EDUCATION

Bachelor in Information Technology

July 2021 - April 2024

Smt. K. G. Mittal Institute of Management, Information Technology and Research

CGPI : 6.80

HSC

Jun 2020 - April 2021

Kala Vidyalaya High School & JR. College

Percentage : 64.50

SSC

Jun 2018 - April 2019

Daya Sagar English High School

Percentage : 55.0

ADDITIONAL INFORMATION

- **Technical Skills:** Project Management, Git & GitHub
- **Languages:** Dart, Python, JavaScript, HTML, CSS
- **Certifications:** Flutter, Django, Flask.
- **Framework & Architecture:** , Flutter, Django, Flask., MVVM, MVC.
- **Network & Database :** SQLite, MySQL,
- **Tools/Software:** Android Studio, VScode, Git, Firebase, Postman.
- **Database & Storage:** Hive (Local Storage), SharedPreferences

PROJECT

- **Project Name: Pokémon App**
 - Developed a mobile application using Flutter to manage Pokémon data with GET and POST APIs.(Third party API)
 - **Technologies Used:** Flutter, Dart, REST APIs
 - Features:
 - **GET API Integration:** Fetched Pokémon data from a public API to display details such as name, type, and abilities in a user-friendly interface.
-

Project Name: To-Do List App

- **Description:** Developed a task management app with features like adding, editing, and deleting tasks. Implemented local storage using SQLite.
 - **Technologies:** Flutter, Dart, SQLite.
-

Project Name: Voice Recorder with Audio Processing Project

Objective:

- To design and implement a voice recorder application that captures audio recordings, sends them to a backend server for processing, receives filtered audio with background noise removed, and saves the processed audio to the system for offline access and future use.
 - Technologies: Flutter, Dart, SQLite
 - Backend : Python by backend developer
-

Project Name: IcerateImage.

Objective:

Developed a feature-rich image editing tool integrated into the project, enabling users to fetch images from the server, edit them with customizable text overlays, and export the edited images in both PDF and JPG formats.

End Goal: Delivered a robust and scalable image editing solution with multi-format export functionality for creative and professional use cases.

Technologies: Flutter, Dart, SQLite
